Projects

NETWORK MANAGEMENT SYSTEM | BACKEND DEVELOPER

A comprehensive Network Management System designed to monitor, manage, and optimize network performance and security within an organization.

META PAGE LEAD SDK | BACKEND DEVELOPER

A software development kit (SDK) designed to retrieve leads from Meta (formerly Facebook) pages. This SDK is built using a core PHP class and provides an efficient and reliable way to integrate lead retrieval functionality into various PHP applications.

WHATSAPP CLOUD API PHP SDK | BACKEND DEVELOPER

A PHP-based software development kit (SDK) designed to communicate with the WhatsApp Cloud API. This kit allows for seamless integration with WhatsApp services, enabling applications to send and receive messages, templates, attachments and interact with the WhatsApp platform programmatically.

ERP SYSTEM | FULL STACK DEVELOPER

An Enterprise Resource Planning (ERP) system built to streamline and integrate various business processes, including finance, human resources, inventory management, and customer relationship management.

PROFESSIONAL PANEL | FULL STACK DEVELOPER

A professional panel designed to manage customer inquiries about projects, generate requirements/tasks based on these inquiries, and facilitate project management for professionals, freelancers, and contract employees.

WHATSAPP CHAT BOX | BACKEND DEVELOPER

A chat application designed to facilitate seamless communication between business owners and their customers through WhatsApp Business accounts, it was developed for a specific client.

TIFFIN/MEAL SERVICE MANAGEMENT APPLICATION | FULL STACK DEVELOPER

A tiffin/meal service management application with a user panel for booking meals and viewing payment receipts, and an admin panel for managing meal bookings, generating reports, and handling payments and menus.

JAN AADHAAR API COMMUNICATION | BACKEND DEVELOPER

A series of APIs designed to communicate with the Jan Aadhaar APIs provided by the Rajasthan government. These APIs offer various services and functionalities related to citizen services, government schemes, and administrative processes.

HEALTHCARE CLINIC MANAGEMENT APPLICATION | FULL STACK DEVELOPER

An application designed for managing appointment booking, diagnosis management, prescription generation, facilitating doctor-patient interactions and other related functionalities.

ORGANIZATION WEBSITE ADMIN PANEL | FULL STACK DEVELOPER

An admin panel designed to manage the content of an organization's website. It allows administrators to update, edit, and delete various website content such as text, images, and other media.

HEALTHCARE LAB MANAGEMENT APPLICATION | FULL STACK DEVELOPER

A healthcare lab management application designed to streamline various laboratory processes such as patient registration, sample collection, test scheduling, result reporting, inventory management, payments and receipts management.

HEALTHCARE HOSPITAL WEBSITE | FULL STACK DEVELOPER

A dynamic website for a healthcare hospital where all the content is driven from a MySQL database. The frontend is built using React, and the backend is powered by Node.js with Express.js.

WHATSAPP BUSINESS CHAT APP & ADMIN PANEL | FULL STACK DEVELOPER

A chat application designed to facilitate seamless communication between business owners and their customers through WhatsApp Business accounts.

Admin panel designed to manage organizations/owners, handle bill payment management, and provide dashboard analytics for the WhatsApp Business Chat App.

META WHATSAPP CLOUD API NPM PACKAGE | BACKEND DEVELOPER

A Node.js SDK for simplifying communication with WhatsApp Cloud APIs. It provides functionalities to interact with the WhatsApp Cloud Business API, including sending templates, messages, attachments, uploading media, and verifying webhooks.

REAL-TIME CHAT APPLICATION | FULL STACK DEVELOPER

A chat application that allows users to sign up, log in, and join group chat rooms with other users to communicate in real-time.

WEATHER APP | FULL STACK DEVELOPER

A weather application that provides users with weather forecasts for their current location and allows them to search for weather information of other places.

QUIZ APP | FULL STACK DEVELOPER

A quiz application that allows users to enter their name, answer a series of questions, and view their quiz results.
