Professional Summary

Backend-focused Software Developer with approximately 4.7 years of professional experience working on enterprise and product-based applications across domains including ERP systems, Network Security & Device Management, DMS platforms, Utility Payments, E-commerce systems, and database-driven applications.

Specialized in Node.js, PHP, and Python ecosystems with strong understanding of backend architecture, API development, integrations, authentication systems, deployment workflows, and production issue resolution. Possesses working DevOps and infrastructure experience including Docker, AWS, GCP, Linux/Unix systems, virtual machines, and cloud deployments.

Technical Skills

- **Backend Technologies:** Node.js, Bun, PHP, Python, REST APIs, Authentication & Authorization, Microservices, Webhooks
- **Frameworks:** Express.js, Laravel, Codeigniter, Django, FastAPI, Flask, NestJS, FilamentPHP
- **Frontend Working Knowledge:** JavaScript, TypeScript, React.js, HTML/CSS
- **Databases:** MySQL, PostgreSQL, MongoDB, Redis, SQLite
- **DevOps & Infrastructure:** Docker, AWS, Google Cloud Platform (GCP), Linux/Unix, Nginx, VM Management, CI/CD
- **Tools:** Git, GitHub, Postman, Swagger/OpenAPI, VS Code, Jira

Professional Experience

SOFTWARE DEVELOPER | ZOLUTE TECHNOLOGY AND CONSULTING PRIVATE LIMITED | OCTOBER 2023 – PRESENT | REMOTE

- Designed and developed backend systems and APIs for enterprise and product-based applications.
- Worked extensively on scalable backend architecture, integrations, debugging, and production issue resolution.
- Handled deployments, infrastructure configurations, and server-side troubleshooting.
- Collaborated with frontend teams, QA teams, and stakeholders for feature delivery and production rollouts.
- Contributed to architecture discussions, optimization initiatives, and integration workflows.

SOFTWARE DEVELOPER | IKONTEL SOLUTIONS PVT. LTD | AUGUST 2021 – OCTOBER 2023 | ONSITE

- Developed and maintained backend logic, CRUD operations, and SQL queries for healthcare-related and database-driven PHP applications.
- Worked on company and client websites, landing pages, and functional web modules with focus on backend functionality and integrations.

- Assisted in debugging, optimization, maintenance, and deployment of existing applications and database systems.
- Collaborated with team members on feature implementation, requirement understanding, and production support activities.
- Built and explored personal projects to strengthen practical skills in backend development, PHP ecosystems, and database architecture.

Highlighted Projects

ERP System

Internal enterprise product designed for organizational operations and workflow management.

- Key Contributions: Backend architecture, APIs, module integrations, role/permission systems, optimization, deployment handling.

Network Security & Device Management System

Enterprise-grade platform focused on device discovery, network access control, alerts, and management.

- Key Contributions: Device discovery logic, network access control & blocking logic, backend optimization, alert handling, API development.

DMS Platform

Management platform involving discovery, monitoring, surveillance, and device management capabilities.

- Key Contributions: Backend services, device discovery & surveillance logic, realtime connection using websocket, authentication flows, integrations, and system management APIs.

PSH Project

Platform including e-commerce marketplace and utility payment systems.

- Key Contributions: Payment/VAS integrations, transaction handling, backend architecture, recharge and electricity payment workflows.

Education

BACHELOR OF TECHNOLOGY | APRIL 2023 | SUDHANANDA ENGINEERING & RESEARCH CENTER

Bhubaneswar, Odisha, India

DIPLOMA | NOVEMBER 2019 | BHUBANANANDA ODISHA SCHOOL OF ENGINEERING

Cuttack, Odisha, India

10TH | APRIL 2015 | B.B HIGH SCHOOL

Rajkanika, Kendrapara, Odisha, India

Additional Information

- Strong debugging and production issue resolution capabilities.
- Experience working in product-based and enterprise environments.

- Comfortable handling both development and deployment responsibilities.
- Familiarity with scalable backend architecture and system design concepts.
- Quick learner with strong adaptability to new and unfamiliar technologies, tools, and development environments.
- Portfolio website available for detailed project showcases and technical demonstrations.
